Worldwide Services in Super Yacht Management

OPERATING TO THE HIGHEST STANDARDS

The greater the size of the yacht, the greater the responsibilities of management and regulation requirements. MTS Yachts Management provides a wide-range of global management services to assist and support owners, captains and crew in all areas of vessel operation. Our team of industry experts includes skilled ex-captains and engineers who bring a wealth of yachting experience to our global offices which are conveniently located within the centers of the yachting industry in the US and Mediterranean.

Feeling Lost?

**WE HELP YOU
NAVIGATE AN
OCEAN OF
REGULATIONS**

Our shore-side management services are indispensable for offshore registered vessels, where complex issues exist, such as tax, flag requirements, crew, budgets, safety, charter requirements, engineering, MLC and many more. We centralize communications, accounting and marine issues related to super yacht ownership; and ensure a yacht operates to the highest international marine industry and super yacht standards.

Mercator Projection
North American Datum of 1927

An owner builds a yacht in order to create a vessel specifically tailored to his or her interests and needs. Our construction management ensures a client's dream vessel is delivered on-time and to his or her specifications.

We manage a yacht's construction by:

- Making cost predictions
- Managing accounts
- Working on-site with the shipyard
- Vetting, selecting and overseeing all contractors
- Budget-conscious supervision of shipyard & contractors
- Ensuring all the correct documentation is on board
- Monitoring the shipyard process
- Regular communication updates to owners/captains
- Easy-to-read progress reports
- Online "Share File" Cloud Central System
- Data Mining

Safety — ISM & ISPS

Safety services for yachts or shore side businesses, ranging from consulting to the production of required documentation.

- Crew Training Manuals
- Fire & Safety Plans
- Station Bills
- ISM - ISPS
- MINI ISM
- Drills & procedures
- Risk management
- Drug testing

 - Drug testing
 - Legal Expert Witness (marine)
 - Marine security
 - Billing issues
 - Helicopter operations
 - Government & defence contracting (US & International)
 - Vessel conversion, cost, time-frame and requirements
 - Pre-Purchase consulting, operational costs analysis
 - Flag / State Registration Class requirements, suitable options
- 

Project Management ~ Taking the Helm

Shipyard and refit work for a large yacht can be complicated and difficult, however, MTS Yachts provides refit management that prevents disaster such as late delivery, over-budget projects and failed repairs and upgrades.

We ensure smooth delivery by overseeing key elements in the process, from beginning to end. We represent the interests of owners and captains, which allows captains and crew time to take leave, or devote time to the other responsibilities of running a large yacht.

Project Management encompasses:

- Producing detailed cost predictions prior to refit
- Assisting in selection, vetting and overseeing, of all contractors
- Keeping shipyard and contractors within quotes and estimates
- Operating and managing escrow accounts and refit accounts
- Working on site with the shipyard
- Attending and monitoring all sea trials
- Keeping costs down by the continuous monitoring of the shipyard and refit process
- Regular progress updates to owners/captains and online “share file” system
- Data mining and record keeping
- Complying with Flag and Class regulatory requirements
- Specializing in the conversion of private yachts to commercial status, thereby allowing the vessel to charter.

Marina & Shipyard Design

We have extensive experience in the requirements of designing, building & operating marinas and shipyards. Over the years MTS Yachts has been involved in many marina and shipyard projects globally, providing the following services:

- Advise and consult
- Training
- Concept and design
- Sub bottom profiling and depth surveys
- Expected and additional areas of revenue
- Global marketing and sales
- Construction and operational management
- Additional marina and shipyard services
- Safety and security requirements
- Discounted equipment
- Environmental requirements
- Impact studies, environment, community and business
- Vessel Requirements

MTS Yachts lead the marina concept and design for the \$50 million Port Antonio Yacht Club, Marina, Marine Police Station and boatyard in Jamaica. We were included as full members of the planning committee from the early design period to the final stages of marketing the marina to the super yacht industry. Among our many contributions for this project were marina design, areas of revenue, dock requirement assessment, security, environmental and financial impact studies.
